- ◆ Optional Choice of Brackets.
- ◆ Alkaline or Rechargeable Power Packs.
- ◆ Powerful White Halogen Search Lamp.
- ◆ High Impact Materials used Throughout.

Shown fitted with HP-42 train bracket with handle

Built to the same standard as the UK Network Rail Approved four aspect Halo Plus2 HP-11R3RT, the HP-11R2 three aspect Personal Signalling Lamp offers a more economic solution for on-platform, on-train or private marshalling yard applications. In its standard form, the HP-11R2 offers a powerful white halogen bulb for seek and search conditions plus a switched red and green high output LED array for signalling use. Because of its flexibility, any signalling colour (subject to wavelength matching) may be incorporated to meet specific requirements. Contact our sales office below for more information.

Weighing in at just 200 grams – ex-batteries, power for the torch is provided by Furneaux Riddall's high capacity re-chargeable and alkaline "C" size cells. A full range of chargers for the re-chargeable cells is available for both mains and in-vehicle use. A low battery indicator may be incorporated into the lamp if required to alert the user to low battery condition.

To personalise the torch, for a small one off charge and a minimum order quantity, a company logo can be moulded into the case of the torch.

For further details of this and other products in the Halo Plus2 and White Knight Ranges, contact our Sales Department at the address below.
