

Furneaux Riddall & Co Ltd

Product Information

Halo Plus2 - HP-11R2VT.

**3 Colour Personal Signalling Torch
for Virgin Trains**

- H High Output Red / Green Signalling LED Arrays.**
- H Powerful White Halogen Search Lamp.**
- H Emergency Tailgate and Headlight Signalling Facility**
- H Alkaline or Rechargeable Power Packs**
- H Low Battery Voltage Indicator**
- H Lightweight**

In today's safety conscious environment, personal safety is of paramount importance. No more so that when working on-track. Furneaux Riddall Ltd in conjunction with West Coast Trains Ltd, has developed the HP-11R2VT to meet the strictest safety specifications and to set new standards in personal signalling and safety.

Using the very latest technology in Light Emitting Diode Arrays, the HP-11R2VT offers high colour output - Signal Red, Signal Green electronically controlled from low profile switches. Each array has multiple LEDs considerably reducing the risk of complete lamp failure through a single filament bulb blowing.

Weighing in at just 200 grams – ex-batteries, power to the HP-11R2VT is achieved through modern battery monitoring technology and Furneaux Riddall's high capacity HP/MN1400 "C" size Alkaline Cells. Furneaux Riddall also offers a range of rechargeable cells, which may be used to power the torch. A low battery indicator is provided to alert the user to a low battery condition.

By using the HP-41 Carriage Bracket or HP-42 Bracket for mounting on rail carriage with handle (shown above), the HP-11R2VT may be used as an emergency lantern for tail or headlight indication on rail vehicles.

To order the Virgin Trains Personal Signalling Pack please quote the following part numbers.

HP-11R2VT - Torch c/w cassette, Belt/Pocket clip, 7 red and 7 green (505nm) LED array Low/V Detection excl. batteries

HP-41 Bracket for mounting on rail carriage.

HP-42 Bracket for mounting on rail carriage with handle.

HP/MN1400 Alkaline batteries type MN1400 (3 required) May also use re-chargeable Batteries.
