Product Information

Halo Plus2 - Model HP-11R3P Personal Signalling Torch

- ★ **Conforms to BS1376 Class B Colour Specification**
- ★ **Powerful White Halogen Search Lamp**
- ★ **Alkaline or Rechargeable Power Packs**
- ★ **Low Battery Voltage Indicator**

In today's health and safety conscious environment, personal safety is of paramount importance. No more so than for personnel working at RTAs and in other dangerous situations. With this in mind, Furneaux Riddall & Co Ltd has developed the HP-11R3P to meet the strictest safety specifications and to set new standards in personal safety at such incidents.

Based on the highly successful Railtrack approved HP-11R3RT – now used as standard equipment by 97% of UK rail train operators, the HP-11R3P uses the very latest technology in High Output Light Emitting Diode Arrays. Matching LEDs offer precise colour to BS1376 "Class B" colour output - Signal Red, Signal Green and Signal Blue, Each array has multiple LED's considerably reducing the risk of complete lamp failure through a single filament bulb blowing. A high output white halogen light is provided for local search situations.

Weighing in at just 200 grams - ex-batteries, power to the HP-11R3P is achieved through modern battery monitoring technology and Furneaux Riddall's high capacity rechargeable Nickel Metal Hydride Cells. Readily available "off the shelf" alkaline 'C' size cells may also be used to power the torch. A wide range of mains and in-vehicle chargers compliment the HP-11R3P whilst a low battery indicator is provided as standard to alert the user to a low battery condition.

The HP-11R3P is fitted with a belt/pocket clip and is designed to fit modern wet-wear used by fire brigades.

For more information and a demonstration of this and other products in the Halo Plus2 and White Knight Ranges call our Sales Office on 023 9266 8624.
