**NEW!**

## Product Information

### Extending 30W Flood/Work Lamp for White Knight®

The White Knight range of accessories has been used extensively by SOCOs in most UK police forces, fire investigators in fire brigades and in many other emergency inspection applications. The ability to set up effective lighting that is easy to carry to incident scenes before the generators can be brought is crucial. By using the **New WKA-25** bracket & monopod kit with a **WKA-24** 30-Watt Flood/Work Lamp the bracket is clipped simply and easily to an existing White Knight handlamp and the Flood/Work lamp plugged into the accessory socket effective lighting is achieved. The fully adjustable monopod may be extended to a working height of up to 1.5 metres allowing accurate lamp positioning. The Flood/Work lamp may also be detached from the monopod and used as a hand Flood and, with the addition of a **WKA-15** adapter may be attached directly to the White Knight if required.
